

Desktop Power Board

Ready to go right out of the box the Desktop Power Board presents a unique array of access points right at the desktop facing the user:

- 4 standard AU/NZ power points
- 2 RJ45 data access points
- 1 USB A
- 1 USB C
- On/Off lighted switch

This gives you full control of your access points without clambering under the desk or chasing the cables to a wall outlet, everything is under your control within arm's reach.

To make it easy to mount and connect, this unit comes with a 3 metre power cable and desktop clamp which fits to any desk or work surface. The 3 metre cable allows for adjusting sit/stand desks. For further peace of mind the Sylex Desktop Power Board also has built-in surge suppression with a safety reset.

If you are over hunting for cable connections and tired of waiting for techs to come and install wiring harnesses and outlet points then help with the cable jungle is right at hand.
